MEAN WELL

# Introduction

## Why choose KNX product?

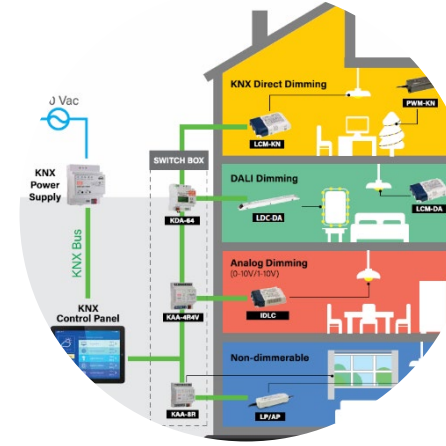

### International Standard

- The only home and building control standard running global certification schemes
- Open platform for any manufacturer to develop

### Reliability

- Product compliance checked at neutral third-party test laboratories.
- Standardized connector prevents misconnection
- Standardized cable to ensure transmission quality

### Endless Flexibility

- Support all systems in the building
- Easy to change existing setting
- Scene function to provide max. comfortability

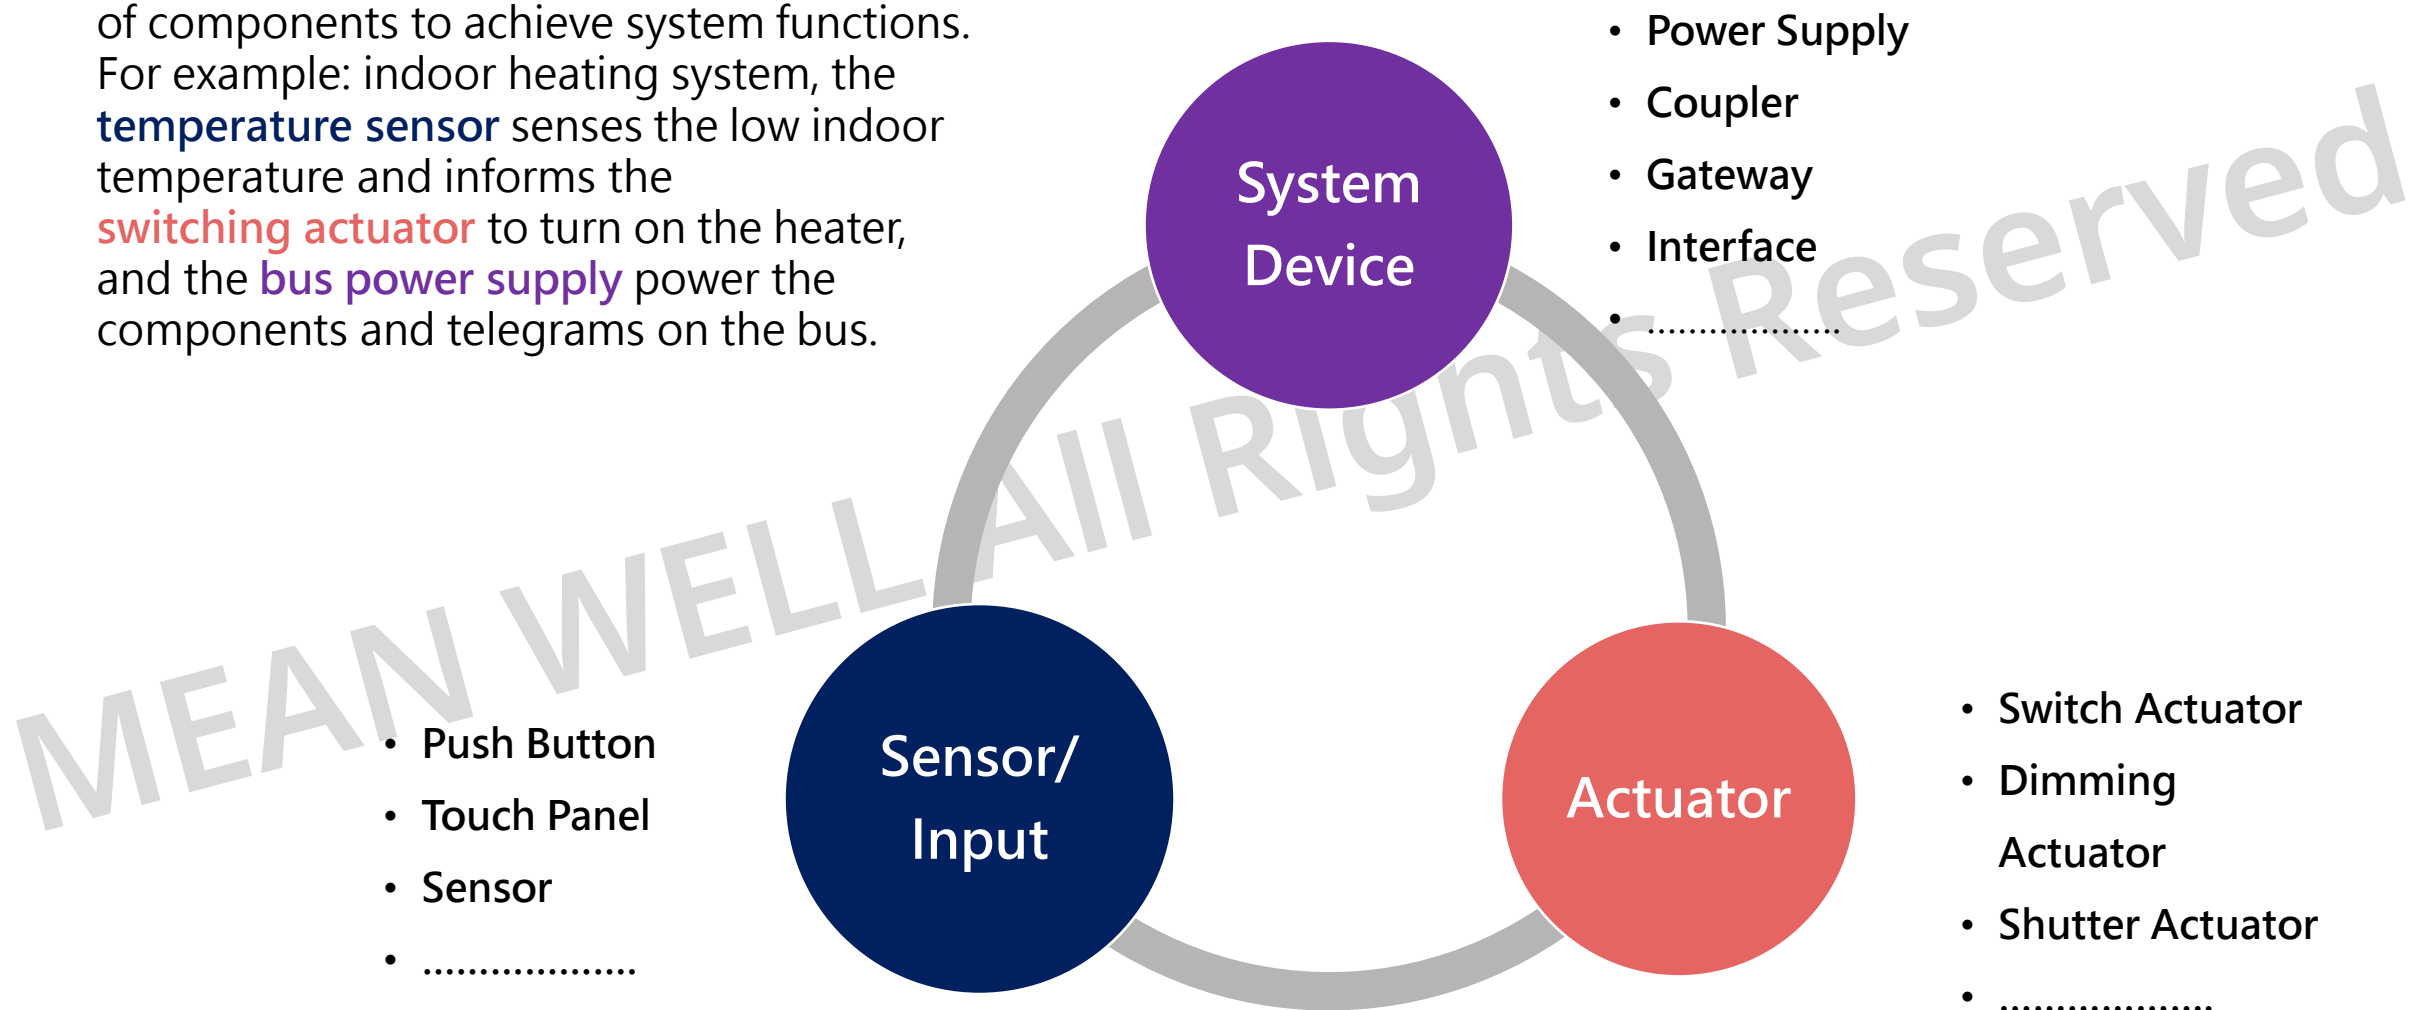

### Software

- One PC software tool for Design, Configuration, Diagnostics
- Multi-language
- Easy management from various devices

# Product Category

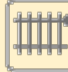

A basic KNX system needs to include three types of components to achieve system functions. For example: indoor heating system, the **temperature sensor** senses the low indoor temperature and informs the **switching actuator** to turn on the heater, and the **bus power supply** power the components and telegrams on the bus.

Bus Power Supply		<b>1280mA</b> <u>KNX-40E-1280(D)</u>	KNX Actuator		<b>4ch Dimming actuator</b> <u>KAA-4R4V-S series</u>    
		<b>640mA</b> <u>KNX-20E-640</u>			<b>8ch Universal actuator</b> <u>KAA-8R-S series</u>     
Interface		<b>KNX-USB Interface</b> <u>KSI-01U</u>	LED Driver		<b>C.C Mode output with KNX dimming</b> <u>LCM-25/40/60KN series</u>   
		<b>Line Coupler</b> <u>KSC-01L</u>			<b>C.V PWM output with KNX dimming</b> <u>PWM-60/120/200KN series</u>    
		<b>KNX-IP Router</b> <u>KSR-01IP</u>	KNX to DALI Gateway		<b>DLC-02-KN</b>  

 Blind/Shutter Control

 Lighting Control

 Push Button Interface

 Constant Voltage Driving Mode

 PWM Style Output Mode

 Logic Function

 Heating Control

 Constant Current Driving Mode

 DC 0-10V Dimming Control

 Data Secure

# Road Map

# KNX in A House

KNX product covers various applications in modern buildings

# Applications

## Lighting

It is suitable for indoor lighting in industrial, commercial office buildings and private houses. Fully digital control is realized. In addition, it supports other lighting systems such as 1-10 V lighting control, DALI via gateway

## HVAC

Heating, ventilation and air conditioning system is integrated into the KNX system for control and monitoring temperature and humidity to achieve comfort environment and better air quality

## Energy management

KNX intelligent building control system provides a variety of control and interface solutions for reducing building operating costs and use the energy efficiently according to demand

# Applications

## Household Control

With a smart switch, you control the AV in the home at user preference, with KNX IP router, Internet of things is realized to remotely control the house

## Shutter / Blind Control

The blinds and shutters are automatically controlled via the motion sensor to achieve the optimum light level according to natural light level which also helps to improve indoor climate

## Security

Sensors such as smoke detector and window open detection can be integrated into security alarm and video surveillance system to perform building monitoring, connect to the fire warning system for early notification, emergency lighting and escape guidance

# WHY MEAN WELL

**P** **Products**   
More than 10,000 models, continues to introduce 10% new models and EOL 5% every year

**Q** **Quality**   
High reliability and quality indicator  
Post-sales failure rate decreases by 10% each year

**C** **Cost**   
High cost-performance products, stable material price, complete supply chain integration

**D** **Delivery**   
24-hour delivery for small amount order.  
14-day delivery for frequent purchase standard products.

**S** **Service**   
MEAN WELL Group and distributors provide services 24 hours a day, and commit to reply within 24 hours

**R** **Reliable Relationship**   
75% of revenue come from long-term distributors and customers
