

Korea – KATS published KC62368-1 formal standard

- KATS has published the new safety standard: [KC 62368-1:2021](#) on Aug., 27th. Which is harmonized to IEC62368-1(3ed), and it is expected that KC 62368-1 will be available for applying [from October](#). ([Link](#))
- The new standard will supersede the original Korean safety standards KC 60065, K 60950-1 and K 60950-22. The existing standards will continue to be used along with KC 62368-1 until 31st December 2022. Thereafter, only KC 62368-1 will be in force.
- Existing KC60950-1 certificates remains effective after 2022-12-31, but it will be forced to upgrade to KC 62368-1 while applying for certificate alteration, which is considered as a new application.
- New application for KC certification will be evaluated [by CB\(3ED\)+KC62368-1](#) from September, and the Standard cost for KC will remain unchanged.
