

System Power Management

- **Application** : Magnetic resonance-guided focused ultrasound (MRgFUS)
- **PSU/Model** : RCP-3K1UI-48C*3pcs+RSP-1600-12PM
- **System Voltage** : 48VDC
- **Control Interface** : I²C & PMBus

Monitor Output Voltage & Current)

System Power Management

- **Application description** : The main purpose of this product is to drive the power components and the peripheral peripheral systems. The equipment is mainly used for ablation treatment applications. The target indications include uterine fibroids, adenomyosis, metastatic bone tumors, etc. During the entire treatment process, the patient will by receive non-invasive, ionizing radiation-free ultrasound treatment in a more comfortable position.
